

HARISH SR

Chennai, Tamil Nadu | +91 6369254389 | srharish34@gmail.com | LinkedIn: Harish SR | GitHub: srharish34-wq

Computer Science undergraduate (B.Tech, CGPA: 8.16) with hands-on industry experience across AI/LLM engineering, full-stack web and mobile development, and digital strategy. Delivered production-grade applications through 3 internships, including multi-agent AI platforms, multi-panel delivery systems, and real-time emergency alert solutions. Published researcher with a copyright certification and active hackathon finalist.

WORK EXPERIENCE

AI Software Engineer Intern

Nov 2025 – Jan 2026 · 2 months

Brakes India Limited

- Worked on LLM and RAG (Retrieval-Augmented Generation) modulation projects for enterprise AI applications
- Designed and integrated intelligent query pipelines using LLM APIs with advanced prompt engineering techniques

Application Developer (Full Stack)

Nov 2025 – Jan 2026 · 3 months

Clouds Dial iServices Private Limited

- Developed a full-stack CRM platform with PHP backend, frontend architecture, and MySQL database management with deployment and CRM customization
- Integrated third-party APIs and built reusable frontend components optimized for scalability and maintainability

Full Stack Developer & Digital Strategist

Jan 2026 – Apr 2026 · 3 months

Almi Digital Marketing Agency

- Built Petrogo — a 4-panel platform (Customer, Delivery Partner, Admin, Nunk) as both website and mobile app using React, Node.js, and MongoDB; received copyright certification for the platform
- Developed Silent SOS, a 3-panel emergency alert system (mobile app, admin & police dashboards) with real-time SOS triggering, Twilio voice/SMS, OpenStreetMap live tracking via Socket.IO, and PDF report generation via PDFKit
- Implemented JWT-authenticated REST APIs with role-based access control for users, admins, and police; built Fast2SMS delivery logging tracking sent, delivered, and failed messages
- Led SEO strategy and digital marketing campaigns alongside full-stack development deliverables

EDUCATION

Bachelor of Technology in Computer Science

Rajalakshmi Institute of Technology | Current CGPA: 7.92/10 | 2023 - Present

Higher Secondary Education (12th)

Paavai Vidhyashram Global School | 72.6% | 2022-2023

Secondary Education (10th)

Kendriya Vidyalaya NLC Neyveli | 89.20% | 2020-2021

PROJECTS

ChronoSphere AI – Temporal Intelligence & Causal Analysis System | Python, LangChain, CrewAI, Neo4j, Pinecone, FastAPI

- Developed an advanced AI analytics platform capable of timeline reconstruction, causal reasoning, Graph RAG retrieval, and future risk prediction using LLMs and multi-agent architecture
- Implemented what-if simulations, semantic search, and evidence-based reasoning across organizational datasets using Neo4j (graph database) and Pinecone (vector search)

- Orchestrated multi-agent AI workflows with CrewAI and LangChain for automated event analysis and intelligent decision support

Petrogo – Multi-Panel Fuel Delivery Platform | *React, React Native, Node.js, MongoDB, Express.js*

- Built a 4-panel platform (Customer, Delivery Partner, Admin, Nunk) as both website and mobile app; received official copyright certification for the platform's architecture
- Developed role-specific dashboards with real-time order tracking, delivery management, and admin controls; published a research paper based on the platform's architecture and implementation
- Implemented cross-platform mobile app with React Native supporting Geolocation, AsyncStorage, and Axios for seamless delivery workflows

Face Recognition Attendance System | *Python, OpenCV, Machine Learning, MySQL, Flask*

- Built an automated attendance tracking system using facial recognition algorithms, achieving 95% accuracy in real-time face detection and recognition using computer vision techniques
- Developed a web-based admin dashboard for monitoring, managing, and exporting attendance records with MySQL database integration

Silent SOS – Emergency Alert System | *React Native, Node.js, MongoDB Atlas, Socket.IO, Twilio, Fast2SMS*

- Built a 3-panel system (mobile app, admin dashboard, police dashboard) with real-time SOS triggering that simultaneously sends SMS to 5 emergency contacts and initiates AI voice calls via Twilio
- Developed live location tracking with OpenStreetMap integration on police and admin dashboards in real time via Socket.IO; implemented JWT role-based access control for users, admins, and police
- Built SMS delivery logging with Fast2SMS (sent/delivered/failed) and PDF report generation for resolved cases using PDFKit, downloadable from the police dashboard

EcoWaste AI – AI-Powered Waste Management | *Python, TensorFlow, React.js, IoT*

- Designed an intelligent waste classification system achieving 92% accuracy in categorizing waste types using image recognition and deep learning models
- Built predictive analytics dashboard to optimize waste collection routes and integrated IoT sensors for real-time bin monitoring and automated scheduling

TECHNICAL SKILLS

Languages	Python, C, Java, JavaScript, HTML5, CSS3
Frameworks	React.js, React Native, Node.js, Express.js, FastAPI, TailwindCSS, Flask, RAG Modulation
Data Science & ML	NumPy, Pandas, Matplotlib, TensorFlow, Machine Learning, LangChain, CrewAI
Databases	MySQL, MongoDB, Firebase, Neo4j, Pinecone
Cloud & Tools	Git, RESTful APIs, LLM Integration, Prompt Engineering

ACHIEVEMENTS

- Finalist in Hackagon National Hackathon and secured Top 20 position in SynapHack for innovative AI and full-stack solutions
- Received copyright certification for the Petrogo project and published a research paper based on the platform's architecture and implementation
- Participated in multiple national-level hackathons including HackSphere, TVS, L'Oréal, and HackEnergy, qualifying for advanced rounds and receiving participation certifications
- Completed 5 industry-recognized certifications: AWS Cloud Foundations, Google AI Essentials, Infosys GenAI, Azure Fundamentals, and Kaggle ML
- Maintained consistent academic performance with CGPA of 8.16 in Computer Science; delivered 8+ production projects across web, mobile, AI/ML, and IoT domains
